

MANAGING DOCUMENTS ON THE MOVE

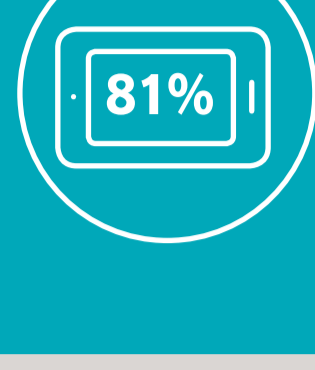

INFORMATION AT EVERY COMPANY IS GROWING

The quantity of documents, version control and various data stores all present unique. Now attempt to take those challenges on the road with some version of document management on mobile devices and the issues compound.

Check out these eye-opening statistics from the 2019 Intelligent Information Management Benchmark Report

M-Files®

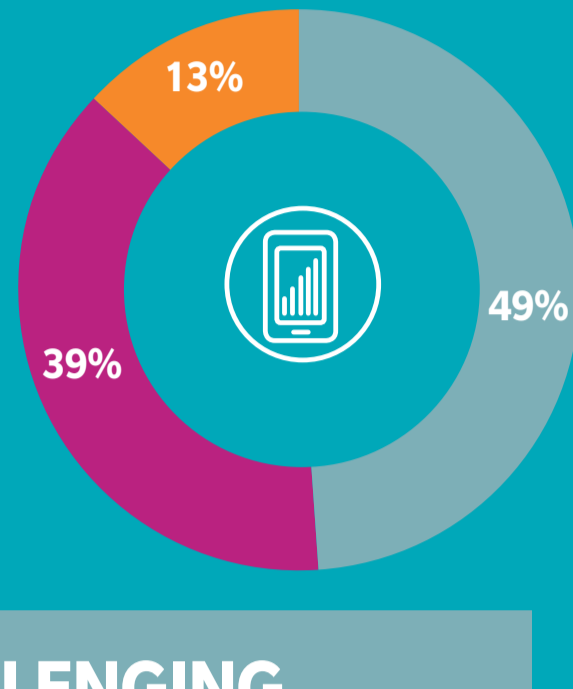

say they need access to corporate documents on their mobile device ...

YET ONLY

say it's quick and easy to find information on a mobile device.

HOW CHALLENGING IS IT TO FIND NEEDED INFORMATION ON A MOBILE DEVICE?

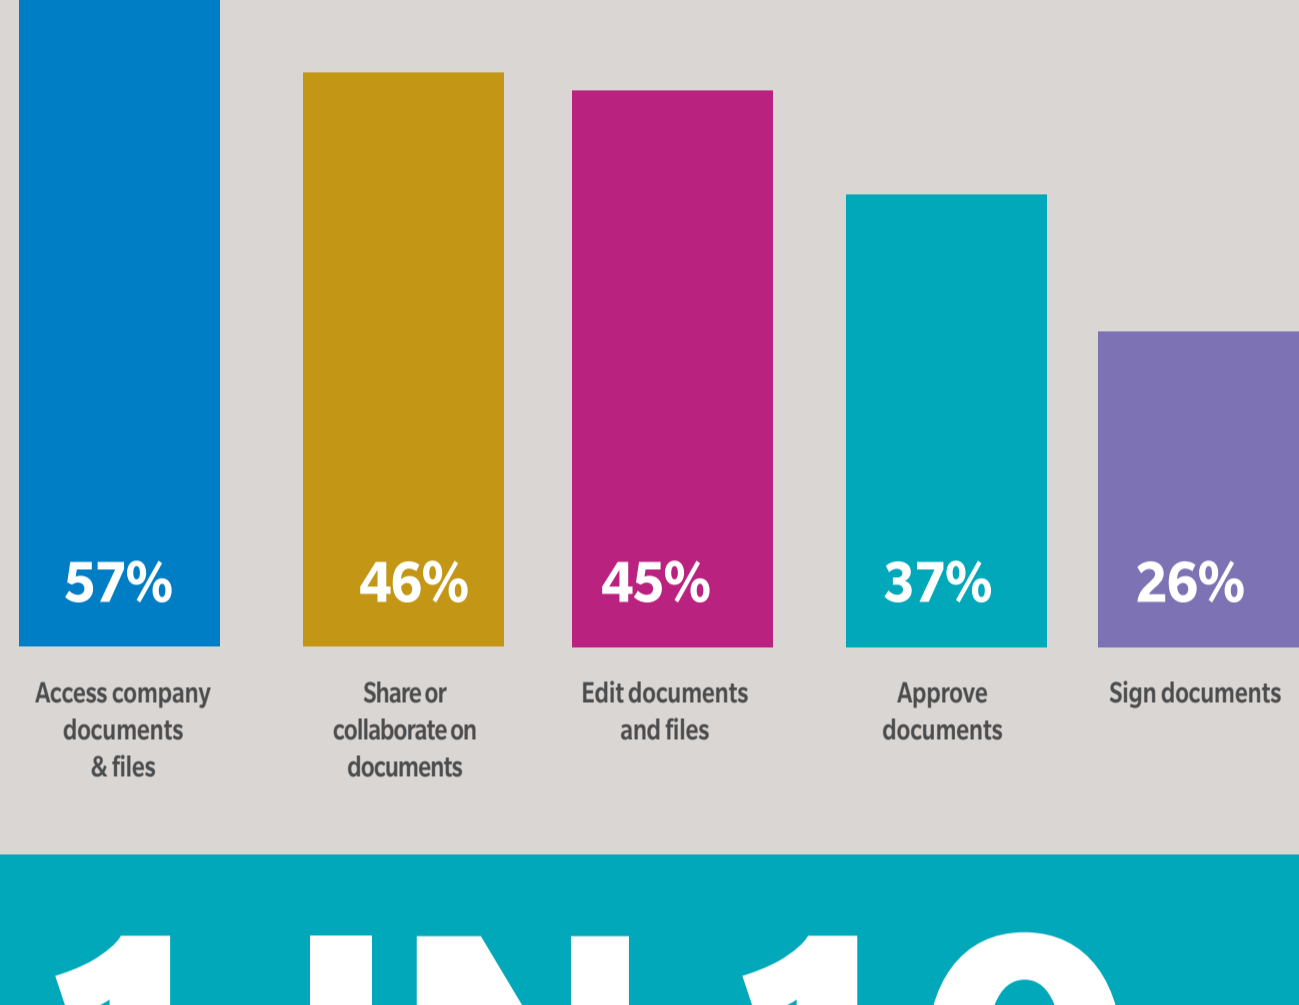

ALMOST ALWAYS CHALLENGING

SOMETIMES CHALLENGING

QUICK & EASY

WHAT CAN WORKERS DO ON THEIR MOBILE DEVICES?

1 IN 10

workers report they can't do any of these things using a mobile device

USE OF PERSONAL DEVICES AND FILE-SHARING APPS

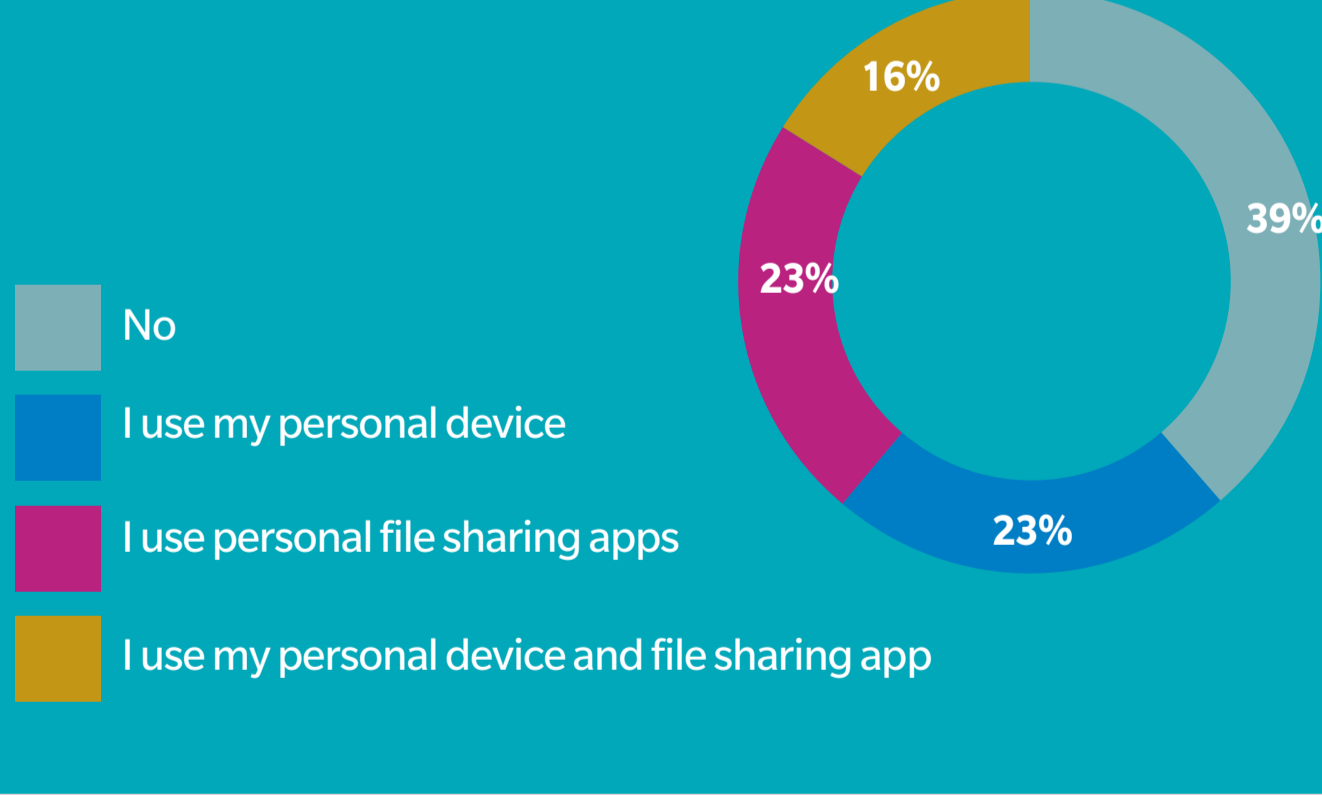

SHADOW IT

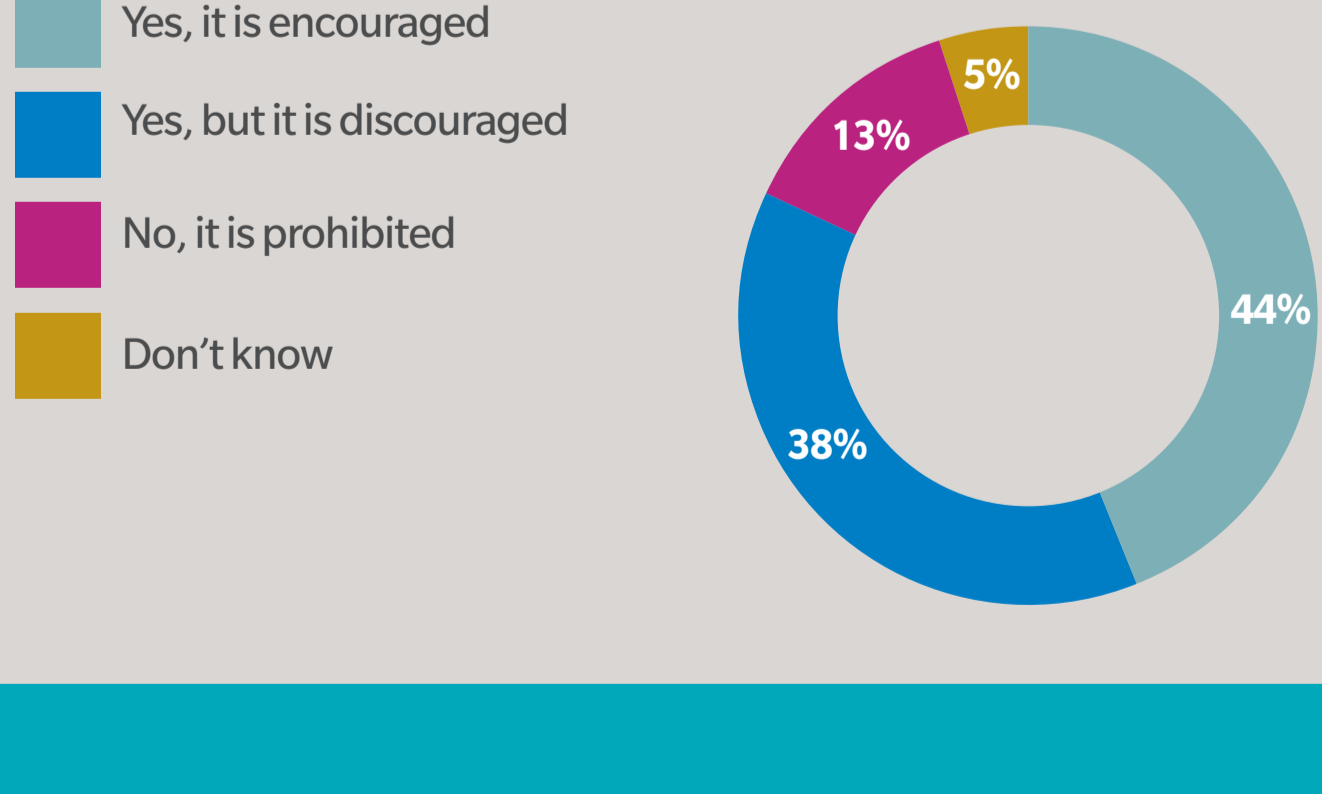

The use of personal devices and file-sharing apps to access and share company information - is a practice that's increasingly scrutinized. Companies are realizing that BYOD and file-sharing open them up to a variety of IT-centric challenges.

61%

report use of personal file-sharing apps and/or their personal device to access and share company information

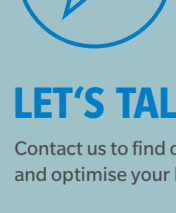

ARE EMPLOYEES PERMITTED TO USE PERSONAL DEVICES FOR WORK FUNCTIONS?

THING YOU DO

More and more, 21st century employees view work as a "thing you do" rather than "a place you go." In other words, the modern employee often works off-site at a home office or other locations. Without access to company information, productivity can come to a screeching halt. Solutions like M-Files can give remote workers the ability to manage information anytime, anywhere.
