

KONICA MINOLTA

DRIVE INNOVATION, AGILITY & BUSINESS GROWTH

WITH IT MANAGED INFRASTRUCTURE SERVICES

As an IT leader, you need to support the business with a growth strategy that outpaces your larger, less nimble competitors. A strategy that drives innovation, insight and agility. However, your resources are too focused on everyday processes like ensuring uptime, maintaining performance and supporting endpoints to turn attention to these value-add activities.

Giving Shape to Ideas

“Our flexible portfolio of services offers round the clock infrastructure availability management, together with performance monitoring and rapid incident response, to optimise performance and minimised downtime.”

Konica Minolta’s IT Infrastructure Management Services free your resources from day-to-day “keeping the lights on” processes to concentrate on more value-generation activities. Our secure, resilient, high performance infrastructure and experienced, expert professionals can manage all or part of your environment – for example, servers, networks, PCs and devices. This reduces your complexity, increases productivity and allows IT to be a better business partner.

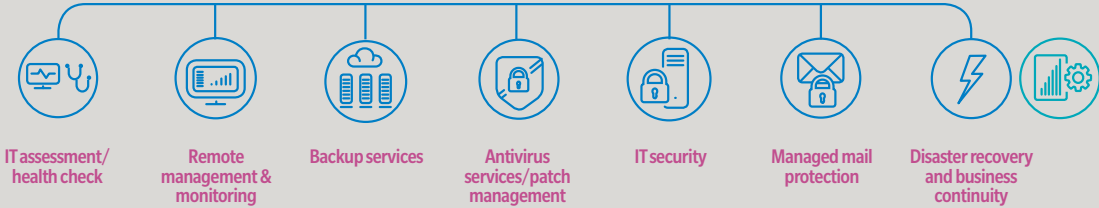

Peace of mind comes as standard. Our flexible portfolio of services offers round the clock infrastructure availability management, together with performance monitoring and rapid incident response, to optimise performance and minimised downtime. All services are agreed at fixed monthly rates with stringent SLAs.

IT MANAGED INFRASTRUCTURE SERVICES BENEFITS

Optimises performance: 24x7x365 remote monitoring and support

- **Maximises availability:** 99.999% platform availability SLA
